

FEATURES:

Reduced Operation Cost:

- Stop being handcuffed to the highest price supplier
- Patented Sealing System
 - Water cooled hold down and continuous temperature sealing element. Minimized “pulled in” corners and reduced replacement of sealing elements (6-8 months replacement time based on average production schedule).
 - Seals through any bag thickness, and through creases or contaminates.

Reduced Maintenance Cost:

- 300 Series Stainless Steel construction
- Most parts available “off the shelf” for economical and quick repair
- Designed for food packaging heavy wash-down environment

Reduced Downtime:

- Easier to maintain and repair – the wear parts are designed to be accessible without complete disassembly.
- State-of-the-art electronics

Faster Production:

Averages 25 packages per minute

Easy Operation:

PLC controlled using a 10” touch-screen display
